

Atlas Optima Consulting, LLC.

A wholly owned subsidiary of The Kenific Group, Inc.

Atlas Optima Consulting, LLC (Atlas) is a wholly owned subsidiary of The Kenific Group, Inc., (KGI). Atlas helps its customers through the entire acquisition process. Through the development of a coherent and fully supported business case to the monitoring of contractor performance. If using other acquisition organizations is right for you, our people know where to go to acquire the services or materials in the fastest amount of time for the lowest cost

Our service delivery includes provision of diverse engineering systems and process support in test, design, and asset engineering. We are also experienced in IT system design and development including Information Technology Service Management (ITSM), smart cloud services, open data, and analytics services. We offer a broad array of program and acquisition support services encompassing multiple engineering services, management consulting services, logistics and supply chain solutions.

Statement of Capabilities

Atlas Optima Consulting, LLC.
A wholly owned subsidiary of The Kenific Group, Inc.

Core Competencies

Energy Management

We manage worldwide enterprise energy resources ranging from water to fuel and provide analytical support for optimal allocation of organizational resources. Our staff identifies and balances organizational needs with federal and agency requirements to develop logistics plans and provides the technical and analytical support for Cost Avoidance, Reduction, and Efficiency (CARE) initiatives that meet organizational goals and mandated requirements.

Information Technology

Our experts support the development of data and IT systems to enhance data mapping, planning, and system design for improved capability providing our clients greater insight, improved efficiency, and cost savings. We specialize in significant IT system consolidation efforts that modernize minor and major IT systems and support client long-term objectives with experience in the provision of ITIL transformation, next-gen service desk operations, smart cloud refactoring, and big data analytics. We are adept in determining the suitability of a commercial off the shelf (COTS) implementation versus developing a new platform to best meet our client's specific needs. Utilizing an agile methodology we have developed tailored analytic, financial management, process management, mobile, training applications, and logistics supply chain platforms on-premises and in cloud hosted configurations.

Logistics & Supply Chain Management

We provide cost-savings to organizations based on sound, cutting edge methodologies in project planning and control, business operations, earned value management, and systems engineering. We have experience in life cycle cost analysis, reliability centered maintenance, fault tree analysis, maintenance planning, failure mode effects, and human factor engineering. We are grounded in Project Management Institute (PMI), Earned Value Management System (EVMS), and Lean Six Sigma best practices. Our staff excel in the business of integrating cost, budgeting, and schedule concepts to ensure the completeness, compliance, and traceability of projects.

Management & Consulting Services

Atlas provides financial planning and budgeting, asset management, records management, office planning, strategic and organizational planning, site selection, business process improvement, and other management consulting services. Our experts provide the analytical support for a variety of services from Business Case Analyses to policy development; efforts that support cost savings and organizational efficiency. We provide our clients with the complete picture of available options to determine the optimal use of personnel and financing in a time of budget shortfalls and spending cuts. Our staff provides these for ACAT I and II programs throughout the program lifecycle and for the full complement of support roles

Administration & Operations Services

Atlas offers day-to-day office administrative support services such as financial planning, billing and recordkeeping, marketing, and personnel management. We also provide a range of business operations support services to include letter drafting, document editing or proofreading, typing, word processing or desktop publishing, and other secretarial services.
